

45FT 10'6 DRY FREIGHT CONTAINERS

45 DRY UNIT - 10'6

The precise specification of our 45ft pallet-wide container can be modified to meet differing needs. The height and width can be varied to meet customers' need or restrictions on certain routes. These 10'6ft high dry containers have especially been built higher for, for instance, the white

good industry (kitchen appliances) and the paper industry. These industries are in need of containers with a higher internal height to transport higher stacked pallets or paper rolls that do not fit in a container with regular height.
