

UNIT53

INTERMODAL INNOVATORS

THE **SAFEST** AND
MOST **SUSTAINABLE**
WAY TO TRANSPORT
YOUR CARGO

53FT DRY SAFETY CONTAINERS

UNIT53 Inc. (a subsidiary of UNIT45 B.V.) offers 53ft dry and refrigerated containers and is more than just an intermediary. It takes full responsibility for the financial arrangements with the factory and contracts separately with the end user regarding price, currency denomination and required delivery location.

In addition to our standard 53ft dry container, UNIT53 Inc. has recently developed the 53ft intermodal safety container, the most secure and reliable solution for transporting your cargo. Whether it's through road, rail, or water, you can trust our safety container to ensure the safe transport of your goods. With Traxens (optional) tracking on the door, you can easily trace the whereabouts of your cargo at any given

time, from the loading to the unloading location. All other tracking providers are certainly possible. This feature provides peace of mind and allows for efficient logistics management. Our safety container is designed with solid doors, reinforced with safety pins and plates, providing an extra layer of protection against theft and tampering. We also offer the optional Power In-Lock lock and/or lock box for enhanced security.

Equipped with lashing rings, our safety container allows for secure and stable stacking of cargo, minimizing the risk of damage during transit. Not only is our safety container built for security, but it is also environmentally conscious. It features a bamboo floor, ensuring sustainability and reducing your carbon footprint.

Additionally, the container is coated with waterborne paint, further promoting eco-friendliness. Choose our innovative safety container for the utmost peace of mind and reliable transportation of your cargo. Trust in our commitment to safety, security and sustainability.

For customers wanting to add our 53ft containers to their fleet, UNIT53 Inc. offers a range of financial solutions to suit most requirements.

Have a look at our website www.unit53.com for more information.
